

SAGE SIDEWINDER®

Marine Miniature Cone Penetrometer System

Applications

- Pipeline Route Surveys
- Cable Route Surveys
- Dredging Surveys
- Shallow Foundation Surveys

Previously available only in limited markets, the SAGE Sidewinder ® is now offered for general sale. This Marine Miniature Cone Penetrometer System, capable of operating in water depths up to 10,000 ft, will revolutionize the way you perform shallow geotechnical site characterization offshore.

For more information about our Miniature Cone Penetrometer system contact us via [e-mail](#) or call our office at 713-988-6635.
